ABOUT

PHILOSOPHY

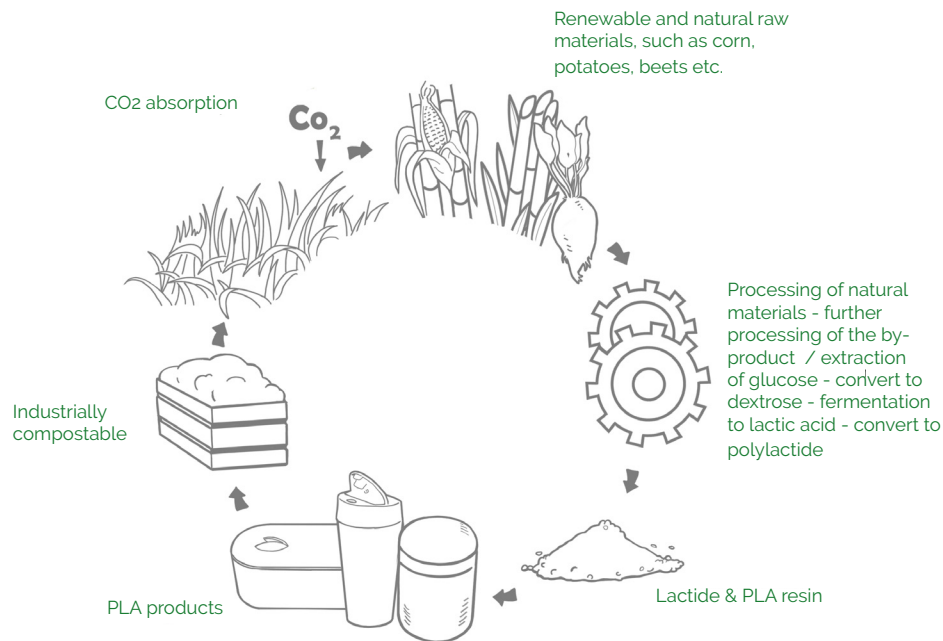

Wir sind auf einer Reise zu mehr Nachhaltigkeit

Wir arbeiten klimaneutral!

Die Zukunft muss klimaneutral werden! Klimaneutralität bedeutet, ein Gleichgewicht zwischen Kohlenstoffemissionen und der Aufnahme von Kohlenstoff aus der Atmosphäre herzustellen. Wir sind uns unserer Verantwortung bewusst und möchten dazu beitragen, dass Europa der erste klimaneutrale Kontinent wird.

We work climate neutral!

The future must become climate neutral! Climate neutrality means achieving a balance between carbon emissions and the absorption of carbon from the atmosphere. We are aware of our responsibility and want to contribute to Europe becoming the first climate neutral continent.

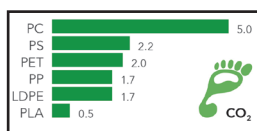

PLA is made from plants and has a very low carbon footprint. It helps reduce CO₂ emissions even before production. Plant sugar gets extracted and PLA resin is produced by fermentation and synthesis.

We have made it our task to offset the emissions generated by our company with the help of climate protection certificates from our partner Fokus Zukunft. Every year, we draw up a comprehensive carbon footprint that takes into account the production of our products, everything to do with logistics and our in-house consumption and other relevant factors.

Our contribution supports projects that are not only intended to sustainably improve the climate, but also strive for social change.

Detailed information on the climate projects we support can be found at www.chicmic.de.
